WORK EXPERIENCE

Associate Software Engineer (Intern)

Feb 2026 – Apr 2026

Mphasis Ltd

Bengaluru, Kar

- Developed 10+ responsive frontend web modules using HTML5, CSS3, Bootstrap, and TypeScript, boosting UI page-load speeds by 25% and enhancing cross-browser compatibility.
- Engineered and integrated 12+ RESTful backend API endpoints using Java, Spring, and Spring Boot to support concurrent user requests with sub-200ms latency.
- Optimized database queries and ORM mappings using Hibernate and MySQL, cutting database response times by 20% across 15+ relational tables managed via Git and Maven.

Data Science Intern

Jul 2025 – Aug 2025

Evoastra Ventures Pvt Ltd

Remote

- Scraped and structured 50,000+ data points from dynamic web pages using BeautifulSoup & Selenium, automating daily data pipelines and saving 15+ manual research hours weekly.
- Developed a deep learning image captioning model (CNN+LSTM with DenseNet201) deployed via Flask, achieving an 85% BLEU score accuracy across 10,000+ test images.
- Enhanced caption inference speed by 30% and accuracy by 15% through hyperparameter tuning, custom tokenization, and optimized feature extraction.

PROJECTS

Fear & Greed vs. Profit: Behavioral Analysis of Crypto Trading | *Python, Pandas, Matplotlib, Seaborn*

- Merged and aggregated 480 days of real Hyperliquid trading data with the Bitcoin Fear & Greed Index, engineering 6 behavioral metrics (volume, PnL, position size, fees, trader count) via groupby aggregation across 5 sentiment regimes.
- Identified a **2x divergence** in average trader PnL across sentiment phases (\$31 avg PnL/trade in Fear vs. \$64 avg PnL/trade in Neutral), challenging the assumption that "Greed" sentiment correlates with higher trader profitability.
- Built comparative visualizations (boxplots, scatter plots) to communicate volume, PnL, and participation trends across sentiment classes, translating behavioral signals into a reproducible analytical report.

Used Car Market Pricing Pipeline | *Python, BeautifulSoup, Requests, Pandas, Matplotlib, Seaborn*

- Built a web scraping pipeline using BeautifulSoup and Requests to extract **9 structured attributes** (price, year, fuel type, transmission, mileage, location) from unstructured HTML across live CarDekho used-car listings.
- Designed a Pandas-based cleaning and structuring layer to convert raw scraped fields into a normalized, analysis-ready DataFrame, replacing manual data entry with a single reproducible script.
- Ran EDA and built Seaborn visualizations comparing pricing across vehicle segments and transmission types, surfacing a **60x price gap** ($(INR)4.5L - (INR)2.79Cr$) between budget and luxury listings.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R

Data Science & Analytics: NumPy, Pandas, Exploratory Data Analysis (EDA), Statistical Modeling, Feature Engineering

Machine Learning & Deep Learning: Scikit-Learn, Regression, Classification, Clustering, TensorFlow, Keras, CNN, LSTM

Data Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn

Databases & Data Engineering: MySQL, PostgreSQL, MongoDB, Data Cleaning, Data Pipelines

Cloud, Tools & Systems: AWS (S3/EC2), Git, GitHub, Linux Commands, Jupyter Notebooks

Core CS Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, Computer Networks

Soft Skills: Problem-Solving, Analytical Thinking, Communication, Data-Driven Decision Making, Collaboration

EDUCATION

Presidency University

Bachelor of Technology (Computer Science and Engineering) , Cgpa: 7.7/10

Bengaluru, Kar

Dec 2022 – May 2026

Kendriya Vidyalaya AFS Yelahanka

CBSE Class XII, Stream: Computer Science , Cgpa: 8.19/10

Bengaluru, Kar

Apr 2021 – Jul 2022

CERTIFICATIONS

AWS Certified Cloud Practitioner: Amazon Web Services (AWS)

GenAI Studio: Powered by Google Cloud

HP Data Analytics: HP

Career Essentials in Data Analysis: Microsoft

ACHIEVEMENTS

- Participated in the **CICADA 2023 Hackathon** hosted by Atria Institute of Technology — *Dec 2023*
- Problem Solver (Silver Badge): 270+ Data Structures & Algorithms problems** across Java and Python on :- [CodeChef](#).
- Data Structures & Algorithms:** Advanced Data Structures & Algorithms and Competitive Programming :- [LeetCode](#).
- Selected in the **top 70 teams out of 450** in the World's Largest Innovation Expo (featuring over 2,600 students) held at Presidency University — *May 2023*
